Bensan Surgidine

Preoperative Hand & Skin Preparation

*Hand Disinfectant
Scrub based on 4%
Chlorhexidine
Digluconate*

Application Areas

Safecare's Bensan Surgidine is a surgical hand & skin scrub based on a highly efficacious yet skin-friendly solution of Chlorhexidine Gluconate.

Bensan Surgidine is highly effective against Bacteria incl. drug resistant organisms, enveloped and non-enveloped viruses, fungi and yeast.

The kill claim and residual anti-microbial properties for up to 6 hours offered by the Chlorhexidine Gluconate make the solution ideal for the strong demands of a hand-disinfectant for surgical use.

The solution does not interact with Latex, Vinyl or Nitrile Gloves and allows for quick donning after use. The foaming spray allows for a smooth application across hands and forearms while the emollients maintain the skin in soft condition.

Bensan Surgidine is recommended for use as an antiseptic handwash and preoperative hand scrub in operating theaters or other highly exposed areas. Bensan Surgidine is also recommended for preoperative skin decolonisation prior to surgery.

The solution complies with the EU Biocides Regulation 528/2012.

Composition

- 4% Chlorhexidine Gluconate
- <5% Ethanol
- <2% Surfactants
- <1% Emollients
- Gelling Agents
- Dye

Shelf life

3 Years from the date of manufacture

Efficacy Claims

Efficacy	EN Norm
Virucidal – Enveloped Viruses	prEN 1476, EN1500
Bactericidal – gram-positive and gram-negative	prEN 12054
Fungicidal	EN 1500

Chemical-physical data

Color	Colorless
Odor	Slight Chlorhexidine odor
Flammable	No
Form	Liquid
pH	7-9

Toxicological Information

Carcinogenicity	None of the components of this product are listed as a carcinogen or suspected carcinogen by OSHA, IARC, and NTP
Reproductive Effects	Not expected from this product
Mutagenic effects	Not expected to cause mutagenic activity
Eye	Can cause eye irritation
Skin	No adverse effects are known
Inhalation	High concentrations may cause upper respiratory tract irritation
Ingestion	No adverse effects are expected

Instructions for Use

Clean carefully under the nails. Dispense about 3mL of the slightly foaming solution (about 1 golf ball) onto one hand. Spread on both hands and forearms, paying particular attention to nails, cuticles, and interdigital spaces and forearms. Rub onto skin until dry (about 3 minutes). Rinse. Repeat process one more time.

Hazard Statements

H319 Causes Serious Eye Irritation

Order Information

Name	Unit of Measurement (UOM)	Reorder Number
Bensan Surgidine	20 X 500 mL/case	SCS1001

Safecare Medical Industries manufactures economically attractive high-quality disinfectants and instrument reprocessing products following environmentally friendly manufacturing processes in our state-of-the art facility.
