

Meet Safecare's Newest Disinfectant: Bensan Surgidine Surgical Hand Scrub

Bensan Surgidine is a surgical hand scrub based on 4% chlorhexidine Digluconate, Isopropyl alcohol, hydrogen peroxide, emollients, thickeners and excipients.

The product is available fragrance free or with a lavender fragrance.

Triple-Use formulation:

- Surgical Hand Scrub
- General healthcare personnel hand wash solution
- Skin wound and general skin cleanser

X reasons to use Bensan Surgidine:

- Strong antimicrobial action due to elaborate formulation consisting of 4% Chlorhexidine Digluconate, 5% Isopropyl Alcohol, and trace amounts of Hydrogen Peroxide complement the antimicrobial range
- Great cleaning efficacy – effectively removes contaminants and debris from hands and forearms

- Offers residual germicidal action of up to 6 hours post application
- Soft on skin and hands – protects the skin and hands from abrasion
- Conceived and manufactured 100% in the United Arab Emirates with medical grade ingredients
- Highly cost-effective solution
