preoperative  
**skin prep**

**CHG 2% & IPA 70%**

A proven system that supports infection control guidelines helping to reduce the incidence of blood stream infections (BSIs) and surgical site infections (SSIs).

# BENSAN PRESURGE CHG 2% + IPA 70% PREP SPONGES

## Properties

Bensan Presurges sponge are surgical site preparation sponges based on a highly efficacious yet skin-friendly solution of Chlorhexidine Gluconate and Isopropyl Alcohol. Bensan Presurge sponges are indicated for skin antisepsis prior to invasive procedures, helping to reduce bacteria on the skin to diminish the risk of surgical site infections.

## Product uses

- For use on intact skin prior to invasive procedures
- For professional use only in Surgery, Dialysis Centres, Emergency Rooms, I.V. Therapy, Intensive Care, Oncology among others
- Abundant: Maximum Treatment Area if 40 X 40 cm per sponge
- Residual anti-microbial efficacy for several hours post application thanks to the sustained release of the anti-microbial agent
- Safe and effective use
- Gentle on skin
- Economical – convenient, pre-soaked ready-to-use sponges attractively priced
- Developed and manufactured in the United Arab Emirates with highest quality ingredients

## Composition

100g of product contain: Clorhexidine gluconate 2% w/w, Isopropyl Alcohol 70% v/v
