

Bensan Incontinence Care Wipes

Patients using diapers can suffer from deformation of the acid layers (the protective skin layers) and drying of the skin in the perineal area as a result of frequent diaper changes and the cleansing with highly basic substances such as soap and water.

The resulting dry skin creates cracks and fissures with an extremely favourable environment for the creation of urinary infection in the area.

Bensan Incontinence Care Wipes takes up the role of degraded natural barrier layer with 3% Dimethicone (organic silicone) content. This layer provides breathability and blocks the transmission of liquid.

Specially designed for the perineal region, the product will not damage the area thanks to its a soft cloth. The cleansing of the perineal region of urine, stool and damaged skin allows the skin to regain the natural structure.

Phospholipid (Omega 3 fatty acids) moisturize dry skin and offer a comfortable cleaning and maintenance supported by special ingredients such as chamomile extract and Vitamin E allowing the skin to regain its elasticity. Bensan Incontinence Care Wipes help the patient feel better after cleaning with the contained pleasant smell.

The product is dermatologically tested.

FORMULATION

- **Aqua:** It is required for skin cleaning and provides a solvent effect.
- **Dimethicone:** Emollient for skin conditioning and skin protection. Dimethicone forms a strong barrier on the skin which can help reduce water loss across the skin surface, in addition to helping protect the skin from external factors (body fluids).
- **Lauryl glucoside:** A soft surfactant, cleanser included in coconut oil.
- **Polysorbate 20:** A Fatty acid. Very good dermatological features, o / w non-ionic emulsifier. Softening agent also used as a thickener suitable for cream and liquid emulsions. Vegetable oils are used as solvents.
- **Tocopheryl acetate:** Vitamin E acetate protects the skin from the sun's ultraviolet rays.
- **Aloe Barbadensis extract:** Moisturizing, softening, soothing, relieving redness.
- **Allantoin:** Keratoplasty substance, softening, moisturizing and soothing herb.
- **Panthenol:** Vitamin B5, increases the softness of the skin, removing redness and moisturizes.
- **Glycerine:** Emollient, Humectant

Material: 80 GSM spunlace non-woven
Wipe size: 22cmx22cm
