

# Bensan Instrulube Concentrate

Non-Silicone Based Lubricant Milk/ Rust Inhibitor For Surgical Instruments.

## Bensan Instrulube Concentrate

Bensan Instrulube instrument lubricant is a non-silicone based lubricant rust inhibitor that extends the instrument life, protecting it from scale and corrosion while facilitating the cleaning process both manually using the ready-to-use product or in a washer disinfector using the concentrate.

### Features:

Ensures maximum protection for medical instruments	Is suitable for use in a washer disinfector as well as manually in an immersion bath	Prevents corrosion, discoloration and scale build-up	Maintains maximum tactile function									
Ensures proper operational condition of moving parts such as hinges	Is heavily concentrated reducing the cost of use	Delivers up to 140 cycles per 4-Liter canister of concentrate	Is highly suitable for use on dental rotary equipment									
Is phosphate free	Is conceived and manufactured in the United Arab Emirates	<table border="1"> <thead> <tr> <th>Product</th> <th>Reorder Number</th> <th>Dilution Ratio</th> </tr> </thead> <tbody> <tr> <td>Bensan Instrulube (Concentrate)</td> <td>IRL1001</td> <td>1:125 to 1:1000</td> </tr> <tr> <td>Bensan Instrulube Spray</td> <td>IRL2001</td> <td>Ready-to-Use Solution</td> </tr> </tbody> </table>		Product	Reorder Number	Dilution Ratio	Bensan Instrulube (Concentrate)	IRL1001	1:125 to 1:1000	Bensan Instrulube Spray	IRL2001	Ready-to-Use Solution
