Bensan EZ Disinfectant Towlettes Hygienic Hand & Skin Wipes

Hand Disinfectant

*Wipes based on
Chlorhexidine
Digluconate and
Ethanol*

Application Areas

Safecare's Bensan Hand Disinfectant Towlettes is a hygienic hand & skin disinfectant towlettes based on a highly efficacious yet skin-friendly solution of Chlorhexidine Gluconate, Ethyl Alcohol and Emollients. The solution is highly effective against Bacteria incl. drug resistant organisms, enveloped and non-enveloped viruses, fungi, yeast and TB. The short kill claim and residual antimicrobial properties for up to 2 hours offered by the Chlorhexidine Gluconate make the solution ideal for the strong demands of a hand-disinfectant.

The large wipes area heavily soaked and provide excellent mechanical and chemical cleaning efficacy. The saturated wipes allow for a smooth application across hands while the emollients maintain the skin in soft condition.

The solution complies with the EU Biocides Regulation 528/2012.

Composition

- 70% Ethanol
- <5% Chlorhexidine Gluconate
- <3% Emollients

Shelf life

3 Years from the date of manufacture

Efficacy Claims

Efficacy	Concentration	Contact Time	EN Norm
Virucidal – Enveloped Viruses	Ready-to-use	1 Min.	prEN 1476, EN1500
Bactericidal	Ready-to-use	1 Min.	prEN 12054
Fungicidal	Ready-to-use	1 Min.	EN 1500
Tuberbulocidal	Ready-to-use	1 Min.	EN 12791

Chemical-physical data

Color	Colorless
Odor	Alcoholic odor
Flammable	Keep away from heat or open flame
Form	Wipes
pH	6-8

Toxicological Information

Carcinogenicity	None of the components of this product are listed as a carcinogen or suspected carcinogen by OSHA, IARC, and NTP
Chronic Effects	None known
Reproductive Effects	Not expected from this product
Mutagenic effects	Not expected to cause mutagenic activity
Eye	Can cause eye irritation
Skin	No adverse effects are known
Inhalation	High concentrations may cause upper respiratory tract irritation

Ingestion	No adverse effects are expected
-----------	---------------------------------
