

Bensan Hand Gel

70% Alcohol-based Hand and Skin Gel

*Hand Disinfectant
Gel based on 70%
Ethanol*

Application Areas

Safecare's Bensan Hand Gel is an Alcohol-based quick-action, no-rinse hand gel for the surgical and hygienic hand and forearm disinfection.

Excellent anti-microbial action and skin tolerance. Suitable for frequent use.

Bensan Hand Gel is highly effective against Bacteria incl. drug resistant organisms, enveloped and non-enveloped viruses, fungi and yeast and TB.

The solution does not interact with Latex, Vinyl or Nitrile Gloves and allows for quick donning after use.

Bensan Hand Gel is recommended for use as an antiseptic handwash and preoperative hand scrub in operating theaters or other highly exposed areas.

Bensan Surgidine Rub is an effective first aid antiseptic that cleans minor cuts, scrapes and burns while helping to reduce the risk of infection. The solution can be used in small amounts on affected areas up to three times daily.

Bensan Hand Gel comes with various skin protective agents, emollients and aloe vera extract to protect your skin and maintain it in healthy condition even after repeated use.

Bensan Hand Disinfectant products come optionally equipped with Ophardt Dispenser. Safecare is an official Distributor of Ophardt in the UAE.

The solution complies with the EU Biocides Regulation 528/2012.
