

Bensan Extra Large Bathing Wipes

Bensan Extra Large Bathing Wipes are intended for whole-body cleaning and care of the patients including:

- intensive care patients
- bedridden patients
- elderly patients
- people having limited access.

Dimethicone in the formulation first creates a strong barrier layer on the skin which can help reduce the water loss across the skin surface while protecting the skin from external factors, preventing the irritation, pressure sores, bed sores and most importantly prevents the incontinence-associated Dermatitis.

Bensan Bathing Wipes are rich in ingredients including Dimethicone, Vitamin E, Provitamin B5, Glycerine, Chamomile Extract, Aloe Vera, Phospholipid.

The product is made from soft tissue with three-dimensional special fabric applied without irritating the skin. Bensan Extra Large Bathing Wipes improve patient feeling, adding a pleasant smell.

The product is dermatologically tested.

FORMULATION

- **Aqua:** It is required for skin cleaning and provides a solvent effect.
- **Lauryl glucoside:** A soft surfactant, cleanser included in coconut oil.
- **Polysorbate 20:** A Fatty acid. Very good dermatological features, o / w non-ionic emulsifier. Softening agent also used as a thickener suitable for cream and liquid emulsions. Vegetable oils are used as solvents.
- **Tocopheryl acetate:** Vitamin E acetate protects the skin from the sun's ultraviolet rays.
- **Aloe Barbadensis extract:** Moisturizing, softening, soothing, relieving redness.
- **Allantoin:** Keratoplasty substance, softening, moisturizing and soothing herb.
- **Panthenol:** Vitamin B5, increases the softness of the skin, removing redness and moisturizes
- **Dimethicone copolyol:** creates a barrier layer.
- **Glycerine:** Emollient, Humectant
