

BENSAN PRESURGE Solution Plus

Clear & Red

Chlorhexidine Digluconate and Isopropanol-based Surgical Site Preparation Solutions

Bensan Presurge Solution Plus Clear and Red are surgical site preparation solutions based on a highly efficacious yet skin-friendly solution of Chlorhexidine Gluconate and Isopropyl Alcohol. Bensan Presurge Solution Plus Solutions are indicated for skin antisepsis prior to invasive procedures, helping to reduce bacteria on the skin to diminish the risk of surgical site infections.

The solution is highly effective against Bacteria incl. drug resistant organisms, enveloped and non-enveloped viruses, fungi, yeast and TB. The short kill claim and residual anti-microbial properties for up to 4 hours offered by the Chlorhexidine Gluconate make the solution ideal for the strong demands of a surgical site preparation.

Bensan Presurge Solution Plus Clear	500mL Bottle	BRC2001
Bensan Presurge Solution Plus Red	500mL Bottle	BRC2002

Ingredients:

- 70% Isopropanol
- 2% Chlorhexidine Gluconate
